Wildlife Review, a quarterly, serves to alert wildlife biologists of current worldwide literature on wildlife management and conservation. Each issue contains separate Author, Geographic, Subject, and Systematic indices. Authors who publish in journals not screened for *Wildlife Review*, and who would like their publications included, should submit reprints to the Editor.

The U.S. Fish and Wildlife Service assumes no responsibility for the accuracy of material from outside sources.

WILDLIFE Review

A current awareness index to wildlife and related literature.

CONTENTS

Conservation
- Natural Resources... 1
- Soils... 3
- Conservation Education... 12
- Bibliographies, Directories, History, and Biographies... 12

Plants
- Habitat Surveys... 12

Wildlife
- General... 13
- Techniques... 14
- Faunas, Natural History, & Manuals... 16
- Natural Areas & Refuges... 19
- Endangered & Threatened Species... 21
- Introductions... 22
- Morphology & Physiology... 22
- Behavior... 23
- Mortality and Survival... 28
- Pesticides & Pollution... 28
- Parasites & Diseases... 29
- Economics, Damage, Predation, & Control... 32
- Hunting--Areas and Problems... 34
- Harvest & Hunting Statistics... 35
- Management & Research--General... 35
- Wetlands/Islands/Riparian Habitat & Wildlife... 43
- Rangeland/Arid Habitats & Wildlife 44
- Forests & Wildlife... 45
- Environmental Impacts & Assessments... 45

Mammals
- General... 54
- Techniques... 54
- Faunas, Communities, & Manuals... 55
- Morphology & Physiology... 56
- Behavior... 59
- Pesticides & Pollution... 59
- Parasites & Diseases... 61
- Economics, Damage, Predation, & Control... 63
- Marsupials... 64
- Moles, Shrews, & Other Insectivores... 68
- Bats... 71
- Rabbits & Pikas... 76
- Rodents
  - General... 78
  - Sciurids... 80
  - Beaver, Muskrat, & Nutria... 84
  - Rattus & Mus... 86
  - Other Rodents... 87
- Carnivores
  - General... 99
  - Canids... 100
  - Bears... 104
  - Raccoons, Ringtail, & Coati... 105
  - Mustelids... 105
  - Cats... 107
  - Other Carnivores... 112
- Marine Mammals... 112
- Ungulates
  - General... 156
  - Cervids
    - General... 157
    - Odocoileus... 158
    - Other Cervids... 164
  - Other Ungulates... 175
- Primates... 183
- Other Mammals... 199

Birds
- General... 201
- Techniques... 202

AVAILABILITY OF REPRINTS AND PUBLICATIONS

WILDLIFE REVIEW does not distribute any of the papers cited herein, nor can the editor of WILDLIFE REVIEW obtain copies of these papers for anyone. A reprint of an article published in a journal may be available from the author, from the organization with which the author is affiliated, or from the publisher of the journal in which the article appeared. When an author's address is known, it is shown in square brackets following the citation. Addresses of most wildlife organizations can be obtained from the CONSERVATION DIRECTORY, an annual publication available from the National Wildlife Federation, 1412 16th Street, N.W., Washington, D. C. 20036. This directory lists more than 900 agencies and organizations concerned with natural resources use.

Use of funds for printing this publication approved by the Diretor of the Office of Management and Budget, March 3, 1976.

Camera copy for this issue of WILDLIFE REVIEW has been generated by computer programs developed by the Editorial Section, U.S. Fish and Wildlife Service, Fort Collins, CO.

Brown, R.G.B. 1986. Revised Atlas of Eastern Canadian Seabirds: I. Shipboard Surveys. Canadian Wildlife Service, Ottawa. 111 pp. Available at $9.60 from Canadian Government Publishing Centre, Ottawa, ON, Canada K1A 0S9

This is an updated version of the 1975 Atlas utilizing a computer-mapping program and a greatly enlarged data base. Standardized observations were made from ships during the period 31 March 1969 to 31 December 1983. Two basic map formats are used, Atlantic (south of 60 N) and Arctic (north of 60 N). For most species pelagic distribution is presented for 4 periods of the year in the Atlantic and 2 in the Arctic. In all, data are presented for 46 species. Of particular interest is a "Vulnerabilities" section which summarized offshore areas where seabirds are potentially most at risk to oil pollution. Stress is placed on dovekies, murres, razorbills, and puffins. Subsequent volumes are to summarize data collection on aerial surveys and to provide updated information on the sites and sizes of seabird colonies. An excellent, six-page bibliography adds much to this valuable contribution. All seabird enthusiasts will want a copy.---Ronald A. Ryder, Department of Fishery and Wildlife Biology, Colorado State University. Fort Collins, CO 80523

Hecht, Max K., John H. Ostrom, Gunter Viohl, and Peter Wellnhofer (editors). 1985. The Beginnings of Birds. Freunde des Jura-Museums, Eichstatt, West Germany. 376 pp. Available at $52.00 from Freunde des Jura-Museums, Willibaldsburg, 8078 Eichstatt, West Germany.

This is a proceedings of a conference on Archaeopteryx held in Eichstatt in 1984 and includes 38 articles by participants from 8 countries on such topics as paleontology, zoology, embryology, physiology, physics, and geology. As only 6 specimens of this 140-million-year-old creature are known, this work represents about everything known about (and speculated about) this controversial bird. It is lively reading, as must have been the meeting. Most papers conclude that Archaeopteryx was more birdlike then previously believed and that it was indeed capable of active flight although there seemed to be no general agreement on a "trees down" vs "ground up" theory of the origin of flight. There continued to be numerous disagreements over certain osteological characters, whether certain bones are distorted, broken or missing in the known specimens. The volume is carefully edited, written in English with German abstracts. References are cited separately for each chapter. It will no doubt be the definitive work on the subject for many years.---Ronald A. Ryder, Department of Fishery and Wildlife Biology, Colorado State University, Fort Collins, CO 80523.

Murphy, William L. 1986. A Birder's Guide to Trinidad and Tobago. Peregrine Enterprises, Inc., College Park, MD; 124 pp. and 36 figures (maps and black and white photographs). Available at $12.95 (softcover) from Peregrine Enterprises, P.O. Box 1003, College Park, MD 20740 [Telephone: 301/552-2585].

One of the best of the literally hundreds of "where-to-find" guides now available, this compact little book is designed to be used with the more detailed, A Guide to the Birds of Trinidad and Tobago by ffrench. One section gives a general review of the geography, climate, habitat, hotels and car rentals. Most of the text is detailed descriptions of the best birding spots and what birds are to be found in the various habitats. Twelve pages of bar graphs clearly highlight the status and season of occurrence of 366 species. Hints are given on how to identify 60 of the more difficult or rare species. The book should be very popular with anyone planning (or dreaming of) a trip to these most fascinating Caribbean islands. Ronald A. Ryder, Department of Fishery and Wildlife Biology, Colorado State University, Fort Collins, CO 80523

As the Nation's principal conservation agency, the Department of the Interior has responsibility for most of our nationally owned public lands and natural resources. This includes fostering the wisest use of our land and water resources, protecting our fish and wildlife, preserving the environmental and cultural values of our national parks and historical places, and providing for the enjoyment of life through outdoor recreation. The Department assesses our energy and mineral resources and works to assure that their development is in the best interests of all our people. The Department also has a major responsibility for American Indian reservation communities and for people who live in island territories under U.S. administration.
